

MYOB Advanced Construction Edition and ProEst Integration

A seamless workflow, from estimating to project management. Anytime, anywhere you need it

In an industry where time is money and the competition is fierce, it pays to have a clear view of every construction project detail—from initial bid to final close-out. But with multiple teams, siloed processes, and limited access to data, information can be inaccurate or incomplete, compromising your ability to make the right business decisions..

A cloud, end-to-end estimating and construction accounting solution can put you in control of your construction projects from start to finish. Using MYOB Advanced Construction Edition and ProEst together streamlines project workflow in a whole new way—accelerating estimate production, enhancing accounting visibility, and providing real-time data access that boosts your bottom line.

With MYOB Advanced Construction Edition and ProEst integration, your people can connect and collaborate with ease. Multiple users can synchronise and share project data anytime, anywhere, and can work together wherever they are—in the office or the field. That means even the smallest details in project reports, cost codes, supplier inputs, and customer data won't be missed or overlooked, and you can be sure your information is always accurate and up to date.

Streamline project workflows for greater project profitability.

Key Benefits

Save time

- + Automate project setup in MYOB Advanced just once, without the need to re-enter data.

Enable collaboration

- + Create complete project visibility for every team member, from the initial estimate to the end of the project lifecycle.

Eliminate errors

- + Work with accurate, consistent, and up-to-date estimate data created automatically in MYOB Advanced.

Give your construction company an edge with MYOB Advanced Construction Edition and ProEst integration. Enter project data just once, and MYOB Advanced Construction Edition and ProEst will do the rest, streamlining workflow and ensuring accuracy in every phase of the project lifecycle.

MYOB Advanced Construction Edition	Data Export	Data Import	ProEst Cloud
Project Automatically Created		<	ProEst Estimate
Setup Cost Budget		<	ProEst Estimate, summarise by Accounting Code
Setup Revenue Budget		<	ProEst Estimate, summarise by Sort Type
Project Documents		<	ProEst Estimate Documents
Inventory	>		ProEst Material Database
Customers	>		ProEst Relationships
Cost Codes	>		ProEst Accounting Code

Together, MYOB Advanced Construction Edition and ProEst help simplify even the most complex estimating and project management processes so that your construction company can work faster and smarter.
